

**INTERVIEW SUMMARY**

On February 12, 2009, Applicant's representative and Examiner Daniel Felten of the United States Patent & Trademark Office conducted a telephonic interview. During the interview, Applicant's representative and Examiner Felten discussed applicants invention, the Himmelstein (U.S. Patent No. 7,080,050), and claims 9-11 and 16-20 (as a representative group). During the discussion, Applicant's representative and Examiner Felten agreed that if dependent claims 9-11 are amended to positively recite the use of the detailed instruction file, and claim 15 is amended to define "comparison tolerance settings", then these claims would be distinguishable from Himmelstein.
